OBJECTIVE

Engineering leader with 16+ years of software development experience and 8+ years managing high-performing teams. Proven ability to scale systems, lead cross-functional collaboration, and deliver enterprise-grade solutions. Seeking an Engineering Manager role to drive technical strategy and team growth in a product-focused environment.

PROFESSIONAL EXPERIENCE

Vertex Software Corporation

Director of Engineering: 2018 - Current

- Managed all company projects for Global 500 client, providing leadership in architecture, development strategy, technical direction, and process governance.
- Built and led cross-functional teams of up to 25 developers across 14+ enterprise projects.
- Over eight years mentoring junior and mid-level developers across multiple project teams, leading performance reviews and growth plans.
- Developed data API integrations across dozens of platforms for enterprise-level websites.
- Partnered closely with stakeholders including product managers, designers, and business leads to define technical roadmaps and align on customer needs.
- Led improvement efforts for team performance in Agile / Scrum methods for projects with Global 500 client, increasing productivity by over 200% in 60 days.
- Drove cultural and team integration after company merger; led onboarding and established best practices.

Web Developer II: 2015 - 2018

- Built and maintained a hybrid platform using C#/.NET and PHP/WordPress for a Central Texas hospital system, integrating pre-existing and new business applications both internal and external to the client's network.
- Led SEO/Performance overhauls of websites for largest clinic network in Central Texas and largest online defensive driving class, reducing page load times by up to 80%; below one second in some cases.
- Added platform support for automated responsive images in company's proprietary CMS, Site Press. This safely reduced page size and page load for all clients without any loss in user experience. At the time, no other CMS offered this feature.

Web Developer I: Apr 2013 - 2015

- Delivered responsive front-end solutions for large enterprise clients with focus on cross-browser performance and accessibility.

City of Arlington, Texas

Marketing Lead: May 2008 - Feb 2013

- Created Parks & Rec. department website earning 2009 & 2010 Best Website award.
- Led event planning and marketing strategies earning 2010 Creative Employee of the Year award.
